THE MEMORY OF THE HEART.

Names, things, and facts—whate'er we knowl-edge call,

There is a common ledger for themail, And images on this cold surface traced,

Give the stream of Education Broader channel, bolder force; Hurl the stones of Persecution Out, where'er they block its course. Seek for strength in self-exertion; Work, and still have faith to wait; Close the gate to Fortune; Muke the road to Houer straight!

Men are agents for the Future! As they work, so ages win Either harvests of advancement, Or the product of their alm! Fellow out true cultivation -Widen Education's plin; From the majesty of Nature, Teach the Majesty of Mont

ERIDAL GREETINGS.

BY JAMES MUSTICIMERY. Ocean and land the globe divide; Summer and Winter share the year; Dorkness and light walk side by side, And earth and heaven are always near.

Though each be good and fair, alone, And glorious in its time and place; In all, when fitly pair'd, is shown

More of their Muker's power and grace. Then may the nuion of two hearts,

So early and so well begun, Like sea and shore in all their part Appear as twiin, but he as one. Be it like Summer-may they find

Bliss, beauty, hope, where'er they roam, Be it like winter, when confined-Peace, comfort, happiness at home! Like day and night-sweet interchange

Of care, enjoyment, action, rest; Absonce or coldness ne'er extrange Hearts by unfailing love possess'd. Like earth's harizon-be their scene

Of life a rich and varied ground; And whether lowering or serene, Heaven all above it and around

When land and ocean, day and night, When years and nature cease to be, May their inheritance be light, Their union one eternity!

THE AFFECTIONS.

Precious are the kind affections Which around this life entwine, Making earth, with all its troubles, Something more than half divine. But, ains! they fade and perish,
Like the bright and fragrant flowers, Sorrow blights, and sin destroys them, And their beauty time deveups.

The not so with those affections. That are set on heavenly things; They will bloom and flourish ever, Vatored by sternal springs; Warmed by overlasting sunshine, Sheltered from the storms of earth, Ever growing and increasing, Ruswing nought of drought or dearth
